BAKER + HOSTETLER LLP WASHINGTON SQUARE, SUITE 1100 1050 CONNECTICUT AVE. N.W. WASHINGTON, DC 20036-5304			DOLE, TIMOTHY J	
			ART UNIT	PAPER NUMBER
			2858	

DATE MAILED: 02/03/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	Application No. 10/022,573	Applicant(s) LIPSCOMB ET AL.	
	Examiner Timothy J. Dole	Art Unit 2858	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 22 October 2004.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-14 and 16-24 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-14 and 16-24 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 23 July 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6, 8-13 and 16-24 rejected under 35 U.S.C. 103(a) as being unpatentable over Frankovitch, Jr. et al. in view of Cannon et al.

Referring to claims 1, 8 and 20-22, Frankovitch, Jr. et al. discloses an oscilloscope adapter for a portable stand-alone electronic device, comprising: a removable module (fig. 1 (10)) adapted to interface with a hardware interface port of a portable stand-alone electronic device, the stand-alone electronic device having a processor and a display (column 26, lines 23-33), the module including a computer program memory, the memory storing computer program instructions thereon to direct the processor to perform the steps of: collecting data representative of a signal from an external source; and displaying the data on the display as a waveform comprising individual data values as a function of time on a graph having a vertical axis and a horizontal axis, each axis having a scale (column 7, line 58 – column 8, line 14 and column 26, line 26). It should be noted that the portable stand-alone electronic device is a personal computer and the hardware interface is through a serial interface (column 26, lines 23-25).

Frankovitch, Jr. et al. does not disclose a removable module adapted to mate with a port of the portable stand-alone electronic device for receiving the removable module, the removable module further adapted to interface with a hardware interface port of the portable stand-alone electronic device when the removable module is located in the port for receiving the removable module.

Cannon et al. discloses an oscilloscope adapter (fig. 1 (16)) for a portable stand-alone electronic device (fig. 1 (12)), comprising a removable module (fig. 1 (16)) adapted to mate with a port (fig. 1 (14)) of the portable stand-alone electronic device for receiving the removable module, the removable module further adapted to interface with a hardware interface port of the portable stand-alone electronic device when the removable module is located in the port for receiving the removable module (column 5, lines 39-62).

Therefore, it would have been obvious to one skilled in the art at the time of the invention to incorporate the port of Cannon et al. into the device of Frankovitch, Jr. et al. for the purpose of making it possible to perform multiple tests using a single device and multiple test cards (column 5, lines 39-45).

Referring to claims 2, 9, 16 and 17, Frankovitch, Jr. et al. discloses the adapter as claimed wherein the adapter further includes a database of model waveforms (column 7, line 58 – column 8, line 14), and the instructions further direct the processor to display a model waveform from the database on the display (column 26, lines 23-58).

Referring to claims 3, 10, 18 and 19, Frankovitch, Jr. et al. discloses the adapter as claimed wherein the adapter further includes a database of collected waveform data (column 18, line 65 – column 19, line 7), and the instructions further direct the processor

to store the data representative of the signal in the database of collected waveform data (column 26, lines 23-58).

Referring to claims 4 and 11, Frankovitch, Jr. et al. discloses the adapter as claimed wherein the adapter or the portable stand-alone electronic device contains a buffer, and the instructions further direct the processor to store the data representative of the signal in the buffer (column 26, lines 23-58).

Referring to claims 5 and 12, Frankovitch, Jr. et al. discloses the adapter as claimed wherein the instructions further direct the processor to provide an electronic device input that, when activated by a user, allows the user to adjust the scale of one or both of the vertical axis and the horizontal axis (column 6, line 44 – column 7, line 5 and column 26, lines 29-30).

Referring to claims 6 and 13, Frankovitch, Jr. et al. discloses the adapter as claimed wherein the electronic device input that allows the user to adjust one or both scales is displayed on a setup screen (column 16, lines 56-62 and column 26, lines 29-30).

Referring to claims 23 and 24, Frankovitch, Jr. et al. discloses the system as claimed except wherein the retaining means comprises one or more extensions in the form of grooves or notches.

Cannon et al. discloses the system wherein the retaining means (fig. 1 (14)) comprises one or more extensions in the form of grooves or notches (fig. 3A-3C and column 3, line 56 – column 4, line 17). It should be noted that since the cards in figs. 3B

Art Unit: 2858

and 3C have extensions on the sides, the interface 14, would have corresponding grooves or notches.

Therefore, it would have been obvious to one skilled in the art at the time of the invention to incorporate the retaining means of Cannon et al. into the system of Frankovitch, Jr. et al. for the purpose of correctly guiding the removable module into the port whereby reducing the possibility of an incorrect connection.

3. Claims 7 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Frankovitch, Jr. et al. and Cannon et al. as applied to claims 1 and 8 above, and further in view of Alexander et al.

Referring to claims 7 and 14, Frankovitch, Jr. et al. as modified discloses the adapter as claimed except wherein the adapter further includes a language database containing data representative of words in a plurality of languages and the method comprises the additional steps of translating text and displaying the translated text on the display.

Alexander et al. discloses a system wherein the display means includes a language database containing data representative of words in a plurality of languages (column 59, lines 54-56).

Therefore, it would have been obvious to one skilled in the art at the time of the invention to incorporate the plurality of languages of Alexander et al. into the device of Frankovitch, Jr. et al. as modified for the purpose of making the device useful in all parts of the world whereby increasing the industrial applicability of the device.

***Response to Arguments***

4. Applicant's arguments with respect to claims 1, 8 and 20 have been considered but are moot in view of the new ground(s) of rejection.

***Final Rejection***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

***Conclusion***

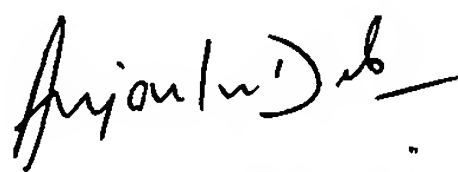

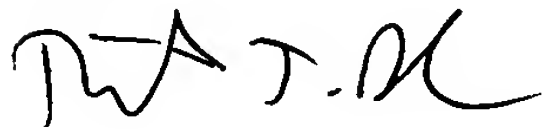

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy J. Dole whose telephone number is (571) 272-2229. The examiner can normally be reached on Mon. thru Fri. from 8:00 to 4:30.

Art Unit: 2858

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on (571) 272-2180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
